

Assignment for Lecture 7

HTML-CSS

Build this page(make it responsive for Desktops, Laptops, Tablets, and Mobile phones)

<https://getbootstrap.com/docs/4.0/examples/pricing/>

You can take any approach of your choice (Desktop first, or Mobile first)

JS-

1. Taking any five random names, find the person with the longest name
2. For the same five names, find the person with the most no. of vowels in his/her name and the person with the most no. of consonants in his/her name
3. For a random set of names, say 10 names, find all the unique names  
ex. "Avinash", "Priyanka", "Manoj", "Veena", "Priyanka", "Akhror", "Vatsal", "Avinash"

Output - "Avinash", "Priyanka", "Manoj", "Veena", "Akhror", "Vatsal"
